EDUCATION PROGRESS REPORT

The Education Progress Report, now in its 10th year of publication, is developed and issued annually by the Greater Austin Chamber of Commerce's Education Progress Report Task Force. Eleven Central Texas school districts and their local chambers of commerce and economic development boards participated this year. The report focuses on high school graduation, college and career readiness, and college enrollment rates, which are closely tied to the workforce talent and, in turn, economic development in the region. It also serves as a tool for the community to track and assess school district performance trends. Additional indicators in the report give a comprehensive view of how the district is performing overall and provides further insight as to predicting success for a future cohort of students leading up to high school.
